To Whom It May Concern:

This is a letter of reference for InfoCentre and its CEO, C.E. "Skip" Weeks.

InfoCentre provided technical support services for my family practice medical office for approximately 3 years. Their knowledge of computer technology was comprehensive and up-to-date. InfoCentre helped me move into a new building and helped me upgrade my server, my backup software, and assisted with my transition to electronic medical records. Skip was always professional and courteous and I remember being very impressed with the vastness of his experience the first time I interviewed him.

InfoCentre was used by my office primarily for technical support issues; however, their expertise also includes helping businesses become more profitable through analyzing their operational configurations. Though I did not formally use InfoCentre for these purposes, I still found them willing to offer useful suggestions to me on how to improve my business practices.

I would highly recommend InfoCentre to you as a comprehensive source of support for your business, whether your needs be technical or whether you want to enhance the profitability and professional profile of your business.

Sincerely,

Kathryn Allen, MD
